SUBJECT INDEX

BIOLUMINESCENCE
adenine nucleotides 463
arachidonic acid 605
bacteria 145
chemiexcitation 457, 463, 605
chemiluminescence 463, 605
chloroplasts 457
E. coli 145
energy transfer 457
Euglena gracilis 457
europium ions 463
fluorescence 463
lipid peroxidation 457
luminescence 145, 457, 463, 605
microsomes 605
mitogenetic radiation 145, 463
peroxidase 457
phenylacetaldehyde 457
prostaglandin synthetase 605
ram seminal vesicle 605
riboflavin 467
riboflavin aggregates 467
riboflavin-tryptophan adduct 467
singlet oxygen 605
spectral dependence 145
time dependence 145
triplet acetone 467
triplet benzaldehyde 457
tryptophan 467
